PROFESSIONAL SUMMARY

Front-End web developer with 10+ years of experience building interactive interfaces and real-time data visualization systems for enterprise and industrial environments. Strong background in JavaScript, HTML5, CSS3, and AngularJS, with solid experience in PHP Back-End development and SQL databases.

Specialized in dynamic dashboards, SVG-based visualizations, and responsive UI development to improve data readability and operational decision-making.

Last two years, focused on AI-driven image generation and workflow development using ComfyUI and Fooocus, including pipeline design, parameter optimization, and basic Python-based customization; currently aiming to integrate AI capabilities into web-based tools and interfaces.

SKILLS

Front-End Development

- HTML5, CSS3, JavaScript (ES6+), jQuery
- Responsive design, semantic HTML, accessibility
- SVG and Canvas, animations (CSS & JS)
- Cross-browser compatibility
- AngularJS (SPA development)
- Basic knowledge of React and Node.js

Back-End Development

- PHP development
- SQL databases (CRUD operations)
- REST API integration
- JSON data handling

Web & Server Management

- Apache & IIS configuration
- Hosting, FTP, domain & DNS management
- SSL implementation
- Website maintenance and deployment
- Version control

AI & Image Processing / Workflow Development

- ComfyUI workflows for image generation, editing, and pipeline design
- Experience with Fooocus for controlled image generation and refinement
- Development of basic custom nodes in Python for workflow customization
- Face consistency techniques (FaceSwap and iterative refinement)
- LoRA training and model customization
- Prompt engineering and parameter optimization

Design Tools

- Inkscape (SVG graphics creation and editing)

PROFESSIONAL EXPERIENCE

Web development

Diestra Business Coaching – Puebla
Web Developer | Apr 2018 – Oct 2019

- Developed an internal corporate dashboard using AngularJS
- Built dynamic control panels for form handling and data visualization
- Improved the usability of internal workflows through responsive UI design

KIMA Solutions S.A. – Puebla
Senior Web Developer | Aug 2017 – Mar 2018

- Built a real-time monitoring system for an automotive production plant
- Designed SVG-based visualizations and graphics for live production data
- Developed dynamic UI components using AngularJS and JavaScript
- Enhanced operational visibility through interactive dashboard interfaces

Prefixa – Puebla
Webmaster | Feb 2015 – Jun 2017

- Maintained and secured the company's WordPress-based website and plugins
- Developed custom dashboards for project tracking and statistics visualization
- Managed hosting, domains, and server configurations

CODICE – Mexico City
Front-End Developer | Apr 2013 – Dec 2014

- Built responsive web interfaces for major brands (Nike, Santander, Suburbia)
- Developed landing pages, newsletters, and mobile-friendly sites
- Collaborated with design and marketing teams on multiple campaigns

INE – Mexico City
Front-End Developer | Jan 2012 – Jan 2013

- Developed a ballot validation system interface for electoral processes
- Implemented front-end logic, PDF handling, and database interaction (CRUD APIs)
- Contributed to data validation and system reliability

EASY Group – Puebla
Full-Stack Developer & Webmaster | May 2009 – Nov 2011

- Developed full web systems using PHP and SQL
- Implemented payment systems, user authentication, microsites, and reservation platforms
- Managed servers, hosting environments, and domain configurations

---

Additional Experience (Customer Service)

- Experience in customer support roles across telecom, insurance, and technical services (2005–2026)
- Strong communication, problem-solving, and client interaction skills
- Ability to work under pressure and handle complex user issues

---

Current Project (in progress)

Industrial Monitoring Dashboard (Demo)

- Recreating a real-time monitoring interface based on industrial systems experience
- Implementing simulated production data with dynamic UI updates
- Designing the interactive dashboard components and visual indicators
- Applying JavaScript and SVG for data visualization
- Planned integration of AI-related concepts for workflow optimization
